Jean-Pascal van Ypersele (1957, Brussels), holds a Ph. D. in physics from the Université catholique de Louvain (Louvain-la-Neuve, Belgium), where he is full professor of climatology and sustainable development sciences. He did his doctoral research on climate modelling at NCAR (National Center for Atmospheric Research, USA). He has published with natural and social scientists about climate change and sustainable development at both global and regional scales.

He has been extensively involved in the IPCC since 1995: lead author, review editor, Bureau Member (2002-2008), and IPCC Vice-Chair (2008-2015). He has participated to most UN conferences on climate issues since 1979, and was, for instance, instrumental in creating in 2002 the UN work programme on climate communication and education. He holds numerous awards in science and science communication. He has been appointed by the UN Secretary General member of the group of scientists in charge of the 2019 Global Sustainable Development Report.
