SouthSouthNorth supports national and regional responses to climate change through policy and knowledge interventions, partnerships and deep collaboration. We do this by connecting people and information, enhancing capability and mobilising resources to respond innovatively to the challenges and opportunities that climate change presents.

**VISION**
A climate resilient world, where ethical and equitable resource management drives a sustainable future.

**MISSION**
We mobilise capabilities and resources to enable equitable, climate-resilient development.

**HOW WE WORK**
We facilitate stakeholder engagement by working through existing networks, thereby strengthening relationships.

Our knowledge of interrelated processes and policy, and our access to relevant expertise, allows us to work in a flexible and adaptable way. We believe that effective stewardship of donor funds is key, but in combination with the provision of appropriate alternatives to the traditional consultancy models.

**OUR VALUE PROPOSITION**
Being positioned in the Global South affords SSN a deeper understanding of, and connection to, the climate and development challenges facing the region.

**OUR PRACTICE AREAS**
SSN structures its work around three key practice areas: Climate Finance, Climate Services and Climate and Development Implementation. Within these practice areas, we work with a variety of partners on a range of programmes across the region.

**OUR PROGRAMMES**
Our programmes deliver on various aspects of climate compatible development across Africa, Latin America and Asia through knowledge management, research, climate finance and policy formulation and implementation.

**OUR PEOPLE**
Our team encompasses a diverse range of experience and skills across climate change and development, including economics, finance, law, technology, stakeholder engagement, and knowledge and project management.
Current Highlighted Projects //
Small Grants Facility - SGF

TIMEFRAME 2015-2020
FUNDERS The Adaptation Fund

Working with communities in South Africa to reduce vulnerability and increase resilience to climate variability and change.

www.southsouthnorth.org

Current Highlighted Projects //
Future Climate for Africa - FCFA

TIMEFRAME 2014-2020
FUNDERS UK Department for International Development (DFID) and Natural Environment Research Council (NERC)

Partnering with African and British universities to maximise development impact of new climate science for Africa.

www.futureclimateafrica.org

Current Highlighted Projects //
Climate and Development Knowledge Network - CDKN

TIMEFRAME 2010-2021
CORE FUNDERS The Royal Netherlands Ministry of Foreign Affairs, and Canada’s International Development Research Centre

Supporting decision-makers in developing countries to design and deliver climate compatible development.

www.cdkn.org

Current Highlighted Projects //
Southern Africa Climate Finance Partnership - SACFP

TIMEFRAME 2016-2020
FUNDERS UK Department for International Development (DFID) Swiss Agency for Development and Cooperation (SDC)

Working in Southern Africa to improve country-owned climate finance portfolios, and their ability to access finance from multiple sources.

**SELECTED PROJECTS IN SSN’S TIMELINE 2000-2021**

- **Climate Resilient Infrastructure Development Facility** 2013-2015
  - Delivered sustainable small-scale infrastructure across 11 SADC countries, focusing on water services, water resource management, and agriculture.

- **Climate Resilient Infrastructure Development Facility 2** 2017-2019
  - Demonstrating how water infrastructure in Southern Africa can be better planned, developed and financed and to deliver long-term impact with value for money.

- **Future Climate for Africa** 2014-2020
  - Generating fundamentally new climate science focused on Africa, and to ensure that this science has an impact on human development across the continent.

- **Mobilising Investment for NDC Implementation** 2017-2020
  - Supporting public actors in the creation of favourable conditions for private and public sector financing of NDC implementation.

- **Small Grants Facility** 2015-2020
  - Working in Southern Africa to improve country-owned climate finance portfolios, and their ability to access finances from multiple sources.

- **Weather and Climate Information Service for Africa** 2018-2020
  - Generating fundamentally new climate science focused on Africa, and to ensure that this science has an impact on human development across the continent.

**CDM Pilot projects and toolkit** 2000-2004
- Implemented Clean Development Mechanism (CDM) pilot projects in Bangladesh, Brazil, Indonesia and South Africa, and designed a toolkit for developers and governments.

**Capacity Development for CDM** 2005-2009
- Assisted the governments of Mauritius, Tanzania, Mozambique, Uganda and Ghana to establish CDM Designated National Authorities.

**Long Term Mitigation Scenarios** 2005-2008
- Co-led the national level facilitated stakeholder engagement process to develop South Africa’s Long Term Mitigation Scenarios, which has been the basis of much of South Africa’s domestic and international climate change policy.

**Sustainable Settlements Facility** 2010-2012
- Sought to provide a financial product to scale up energy efficiency interventions for large-scale, low-income public housing.

**Mitigation Action Plans and Scenarios** 2010-2015
- Supported the Governments of Brazil, Chile, Colombia and Peru to develop low carbon development pathways through rigorous research and stakeholder driven planning processes.

**Climate and Development Knowledge Network** 2010-2021
- Supporting decision-makers in developing countries to design and deliver climate compatible development.

**GestiónCC** 2015-2021
- A Peruvian-based project that aims to improve the country’s NDC implementation ability and to positively influence Peru’s engagement at the regional, national and international level.

**Africa LEDS Partnership** 2015-2020
- Connecting stakeholders to share experiences, information and expertise for the advancement of Low Emission Development Strategies in Africa.

**Future Climate for Africa** 2014-2020
- Supporting public actors in the creation of favourable conditions for private and public sector financing of NDC implementation.

**Southern Africa Climate Finance Partnership** 2015-2020
- Working in Southern Africa to improve country-owned climate finance portfolios, and their ability to access finances from multiple sources.

**Small Grants Facility** 2015-2020
- Working with communities in South Africa to reduce vulnerability and increase resilience to climate variability and change.

**Climate Resilient Infrastructure Development Facility** 2016-2020
- Working in Southern Africa to improve country-owned climate finance portfolios, and their ability to access finances from multiple sources.

**Mobilising Investment for NDC Implementation** 2017-2020
- Supporting public actors in the creation of favourable conditions for private and public sector financing of NDC implementation.

**Climate Resilient Infrastructure Development Facility 2** 2017-2019
- Delivered sustainable small-scale infrastructure across 11 SADC countries, focusing on water services, water resource management, and agriculture.
